**Evolutionary Theory for Social-Ecological Change**

The KLI supports research focusing on evolutionary theory in relation to development, cognition, and sustainability science, as well as on the history, philosophy, and social studies of science. The KLI is an independent center of advanced studies in the life and social sciences, led by Lynn Chiu. Please send comments and questions to comms@kli.ac.at.

---

**Event Highlights**

**Evolutionary Theory for Social-Ecological Change**

Evolutionary theory and epistemology are general principles that apply across a diverse range of scientific disciplines. The KLI is hosting a series of events that focus on the intersection of evolutionary theory and social-ecological change. These events will explore how organisms may be investigated as potential agents of agency in living systems.

**RESEARCH HIGHLIGHTS**

**Extending our external faculty**

The KLI supports research focusing on evolutionary theory in relation to development, cognition, and sustainability science, as well as on the history, philosophy, and social studies of science. The KLI is an independent center of advanced studies in the life and social sciences, led by Lynn Chiu. Please send comments and questions to comms@kli.ac.at.

**VIENNA SERIES IN THEORETICAL BIOLOGY**

**Pathological Theory**

Now available: Biological Theory June 2022 issue! Read more...

---

**Supporting Ukraine**

The KLI is supporting the Science Alliance for Ukraine, a website that collects academic and research offers (in the life sciences) for Ukrainian scientists. The KLI is also supporting the Vienna Series in Theoretical Biology (Vienna Series in Theoretical Biology Press), edited by Thomas F. Hansen, David Houle, Mihaela Pavlicev and Evolvability, a Unifying Concept? Christophe Pélabon, is coming out next summer in the Vienna Series in Theoretical Biology Press.
